# GrowthXP Partogram

Birth Process Visualisation
A Comprehensive Labour Care Tool

PC PAL

Clinical Excellence in Active Labour Monitoring

GrowthXP Partogram provides near real-time tracking and visualisation of key labour parameters, including:

- Oxygen saturation
- Respiratory rate
- Temperature
- Pulse and blood pressure

- Fetal descent
- Fetal heart rate
- Uterine contractions
- Cervical dilation

Reporting and Analysis

GrowthXP Partogram documentation supports accurate and comprehensive record-keeping. It enables:

- Near real-time documentation
- Compliance with medical documentation

The tool's structured format visualises all recorded information, crucial for both patient care and reviews. It also facilitates the creation of a clear, chronological record of the entire labour and delivery process.

A **Parent-Centered** Approach

GrowthXP Partogram meets the needs of parents, supporting informed decision-making and a positive birth experience. This tool offers a comprehensive solution that aligns with the principles of respectful maternity care. It includes:

- ♦ Concise Postpartum Summary: a clear and easy-to-understand overview presented in a take-home format for follow up review.
- ♦ Visual Aids: to enhance comprehension.

By acknowledging the emotional aspects of childbirth and providing a framework for discussing the experience, GrowthXP Partogram empowers parents throughout their journey.

"As a mother of three myself, this is exactly the type of report I would like to take home with me."
Midwife, Sweden

GrowthXP Partogram visualises available data and information, optimising the presentation for best user experience

Main Features

- High-quality, high-resolution graphics with unparalleled detail, readability, and accuracy.

- Detailed view of the labour process depicted across several different graphs.

- An intuitive, interactive web-based user interface that is easy to use.

- More than 130 discrete data fields and half of them with multiple occurrences.

- A complete partogram record can easily consist of upwards of 1000 measurements.

- Print preview mode providing the user with a complete and updated overview.

- Responsive timeline visualising and documenting the sequence of events.

- Audience-specific report designed to deliver a professional and clear experience when printed, to accommodate legal, professional, and parental perspectives.

- Built upon the robust, high-performance platform GrowthXP.

Customisable Settings

- Settings are provided to ensure that clients can customise the partogram module to align with their care guidelines.

- Client defined cervix dilation event threshold.

- Prolonged Rupture of Membranes duration threshold in hours.

- Hide/Display cervix dilation threshold attainment line.

- Hide/Display 'Now' line.

- Show/Hide 0-3 scale labels for cervix dilation.

- Enable/disable Alert and Action lines.

- Alert and Action lines: customisable gap and labels.

- Slope of Alert and Action lines for primiparous or multiparous mothers.
