

# GrowthXP Partogram

PC PAL's digital partogram is designed to visualise the total birth process and integrate with routine maternity clinic practice.

## Visualisation

Provide a record of labour in real time based on a full range of childbirth variables

## Interpretation

Improve situational understanding with multiple charts and report options

## Decision support

Recognise potential interventions by identifying deviation from expected labour

## Integration with the health record

Increase accuracy and speed by avoiding duplication

EXCELLENCE IN SOFTWARE DESIGN
